

The Glades, Putra Heights

PROJECT INFORMATION

City: Selangor

Country: Malaysia

Project Startup: 2011

Project Completion: 2014

STREAM AWCS

Type of AWCS: Hybrid System

Total Pipe Length: 2,100m

Number of Fractions: 1

Estimated Waste per Day: 1.2 metric tons

The Glades at Putra Heights has raised the bar to perfection as an added value high-end residential development with STREAM system in place. It sets the milestone for STREAM, with our unique Gravity and Full Vacuum Automated Waste Collection Systems installed in our very first landed properties project. We provide our client an advanced waste management system which transfers the garbage from every home to the recycling depot. The environment is cleaner and healthier. The Outdoor Load Station is located every 30m distance for a more convenient and quick disposal. The Central Waste Handling Facilities (CWHF) is situated at the secondary entrance, which is located some distance away from the inhabited area. There is no more garbage trucks accessing the residential area, as a result, the security level is well enforced.
